

The Sony DSR500WSP DVCAM

DVCAM is a broadcast quality workhorse format. This camera provides the best possible picture quality DVCAM can offer with 3 x 2/3inch Power HAD WS™ CCD chips producing 980/850 TV lines in 4x3/16x9 mode.

DVCAM is also the most cost effective broadcast quality video tape format and this camera takes both small and large size tapes.

The Sony DSR500WSP DVCAM is a shoulder mounted broadcast spec camcorder. Widescreen pictures from this camera are true widescreen and NOT simulated like many other cameras. This camera produces superb pictures.

Also fitted to the camera is a 26 pin socket for component connection to a field recorder, CCU or outside broadcast/studio use. Our camera is kept in tiptop condition and is pampered.
